

Ioane Faumui

FULL STACK SOFTWARE ENGINEER

Recife, PE, Brazil • +55 (45) 99832-7553 • johnfaumui@gmail.com • linkedin.com/in/ioanefaumui
Portuguese (Native) • English (Fluent)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience building scalable web applications and content-driven products. Strong in React, TypeScript, GraphQL, API integration, modern JavaScript frameworks, and headless CMS platforms. Progressed from frontend development into a full-stack role at Suflex, with a focus on maintainability, performance, testing, and cross-functional delivery.

WORK EXPERIENCE

- Full Stack Software Engineer | Suflex Tecnologia**

Mar 2025 - Present

 - Develop and maintain product features across frontend and backend layers for a high-traffic SaaS platform serving approximately 50,000 daily users.
 - Build modern web interfaces with React, TypeScript, GraphQL/Apollo, Zustand, and Context API while integrating APIs and complex business workflows across the product.
 - Improve reliability and maintainability through automated testing, code reviews, technical documentation, and close collaboration with product, design, and engineering teams.
- Frontend Developer | Suflex Tecnologia**

Jul 2022 - Mar 2025

 - Migrated legacy code to a modern, secure, and maintainable architecture and implemented state management with Zustand and Context API for complex business rules.
 - Expanded unit and end-to-end test coverage with Jest, React Testing Library, and Cypress, strengthening quality across core product workflows.
- Frontend Developer | QueroQuitar**

Oct 2021 - Jul 2022

 - Developed and improved a content platform with Vuepress, Forestry CMS, Gulp, and Webpack, helping increase organic search contribution to revenue from 2% to 12%.
 - Reduced mobile blog loading time from approximately 6 seconds to 2 seconds and implemented JSON-LD and semantic HTML improvements for technical SEO.
- Programming Mentor | Kenzie Academy Brasil**

Apr 2021 - Jul 2021

 - Mentored students in HTML, CSS, JavaScript, Git, DOM manipulation, semantic HTML, accessibility, and clean web development practices; also produced technical tutorials for hundreds of students.
